

Vitamin B1 Injection

ACTIVE INGREDIENTS: Each mL contains Thiamine Hydrochloride 125mg/mL

DESCRIPTION: **Value Plus Vitamin B1 Injection** is a vitamin supplement to aid with vitamin B1 deficiency in horses and dogs.

PACK SIZE: 100mL multi-dose bottle

DIRECTIONS FOR USE: Administer by intramuscular injection twice weekly or as directed by a veterinary surgeon.

Horses: 5 - 10mL or as required

Dogs/Greyhounds: 1 - 2mL or as required

SPECIAL FEATURES: Thiamine is a B group vitamin. Like all B group vitamins, thiamine cannot be stored by the body because it is water soluble. It is therefore important to use a nutritional supplement such as **Value Plus Vitamin B1 Injection** to replace vitamins that are lost. Thiamine is required by every cell in the body to produce the fuel that the body runs on - adenosine triphosphate (ATP). Thiamine processes protein, carbohydrates and fat. It plays a role in sustaining metabolism and in assisting in the maintenance of normal appetite and bodyweight. The use of a thiamine supplement is an aid to the nervous system and the digestive system, as well as assisting normal muscle function.

Value Plus Vitamin B1 Injection is Australian owned and made.

STORAGE: Store below 25°C (air conditioning). Protect from light.
