

Biotin

ACTIVE INGREDIENTS: Biotin 180mg/kg in a calcium and montmorillonite base.

DESCRIPTION: A hoof growth supplement in a fine, granular powder that aids in the treatment of abnormal hoof growth due to deficiency of dietary biotin.

PACK SIZE: 5kg and 20kg buckets

DIRECTIONS FOR USE: Each bucket comes with a measuring spoon that holds 30 grams.

Each 90gm dose of **Value Plus Biotin** will give 16mg of biotin.

Mix with food as required.

Ponies and weanlings **60g** (2 scoops) **once daily**

Light horses (300kg) **90g** (3 scoops) **once daily**

Medium horses (400-500kg) **60g** (2 scoops) **twice daily**

Heavy horses (600kg) **90g** (3 scoops) **twice daily**

Treatment should be continued for six to nine months for maximum therapeutic effect.

SPECIAL FEATURES: The use of supplemental biotin is the most important factor for the growth of a normal hoof wall. It has been used successfully in equine hoof care for over sixteen years.

A daily supplement of biotin needs to be continued over several months to achieve substantial improvement in the quality and growth rate of the hoof. Once the hoof has strengthened, continue using biotin to prevent the hoof wall from deteriorating.

The added bonus of using biotin regularly is that along with strong, healthy hooves, biotin also helps with a shiny coat and healthy skin.

Value Plus Biotin also contains calcium and montmorillonite. Calcium is essential for bone growth and montmorillonite slows the fermentation of grains and pellets, thus helping to reduce circulating endotoxin levels and to maintain blood supply to the hoof.

Value Plus Biotin is safe to use with other supplements.

STORAGE: Store below 25°C (Air Conditioning).

Protect from moisture.
