	Copper (as proteinate)	0.4mg	

DESCRIPTION: **Organic Vitamin & Mineral Powder** provides essential vitamins, minerals, calcium and amino acids for dogs and greyhounds of all ages, to supplement diets which may be deficient.

Organic Vitamin & Mineral Powder contains calcium, magnesium, iron, manganese, copper and cobalt in natural chelated form, which avoids interactions with the other nutrients, including iodine, selenium, Vitamins A, D, E, B1, B2, B6, B12 and folic acid.

PACK SIZE: 450g jar / 3kg re-useable pail

DIRECTIONS FOR USE: **Growing puppies, pregnant/lactating bitches, and stud dogs:** One level measure (5g) per 5kg bodyweight daily
Adult dogs: One level measure (5g) per 10kg bodyweight daily

SPECIAL FEATURES: Unlike some other supplements, **Organic Vitamin & Mineral Powder** contains safe levels of Vitamin A and D and can confidently be used in performance greyhounds, working dogs, stud dogs, bitches and growing puppies.

Organic Vitamin & Mineral Powder use Mineral Proteينات prepared under a patented process which promote greater absorption from the small intestine than minerals in a chemical/synthetic form. These Mineral Proteينات are true chelates that are in a natural protein form which closely resemble the naturally occurring minerals found in milk, fruit and vegetables, and which provide optimal absorption without toxicity.

Organic Vitamin & Mineral Powder, when fed in conjunction with normal feeding practices, can enhance breeding potential in both stud dogs and bitches, and can aid in the structural development of growing puppies. Greyhounds are also able to utilise the highly available Mineral Proteينات to build their stamina.

Organic Vitamin & Mineral Powder is Australian owned and made.

STORAGE: Store in a dry place below 30°C (room temperature).
